Education

Technical Degree in Information Technology - Centro Universitário Eniac, Guarulhos *Jan 2023 - Dec 2025*

GPA: 9.4/10 | Relevant Coursework: Applied Mathematics, Programming Logic, Computer Architecture, Web Technologies, Databases, Computer Networks, Object-Oriented Programming (OOP), Mobile Development.

Experience

Frontend Developer Intern - Colégio Eniac

Jan 2025 - Dec 2025

- Led a team of 4 interns in the development of web applications, ensuring code standardization, delivery quality, and component consistency across projects;
- Defined component architecture and styling conventions, significantly reducing rework and improving scalability, readability, and maintainability;
- Built responsive and accessible interfaces with a focus on performance and technical SEO, while also structuring APIs and standardizing data flow to improve application reliability and predictability.

Tech stack: React, Next.js, TailwindCSS, TypeScript, Zod, React Hook Form

Projects

Neo Mental - Multi-profile mental wellness platform

Worked as a technical mentor and frontend developer on a web application focused on mental health, leading architectural decisions and UI standardization. Guided the team in using a modern stack and developed components and pages, structuring flows for different user roles (user, company, and psychologist), including AI chat and personalized report generation.

Tech stack: Next.js, React, TypeScript, TailwindCSS, Docker, Biome.js, PostgreSQL, Prisma

Madelt - CLI for local code template reuse

Developed a command-line tool that allows saving and reusing project templates locally, eliminating repetitive setup and speeding up new project initialization. Includes cloning, listing, and template management features, focused on productivity and workflow standardization.

Tech stack: TypeScript, Node.js, Bun

Capivara - E-commerce platform for a clothing store

Developed a full web-based e-commerce application with product, user, and order management, structuring a complete CRUD system and operational control. Implemented authentication and role-based access control (RBAC), along with features like cart, favorites, filters, search, and inventory management, simulating a real online shopping flow.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

Certifications

NLW Connect React - Rocketseat (2025)

Languages

Portuguese - Native | English - Professional Proficiency (B1) | Italian - Beginner (A1)
